GENERAL INDEX

Compiler: Linda A. Whitmarsh
Editor: J. Wallace Donald
Managing Editor: Linda A. Whitmarsh
Linguistics Editor: Harold J. Kane
Programmer: Samuel Coleman

The monthly indexes and the cumulative index were prepared at the University of Colorado Graduate School Computing Center with the aid of the Center for Computer Studies in the Humanities.

EXPLANATION OF THE INDEX

The index contains two alphabetical listings. The first lists the subject of each abstract; the second is a list of article authors. The subject index contains the names of all individuals discussed and the general subject matter for each abstract; there may be several entries for an abstract. Authors primarily known by pen names are indexed under them; their real names in parentheses, follow their pen names, e.g., Macdiamid, Hugh (C. M. Grieve). Some authors, e.g., Mark Twain; are so well-known by their pen names that we do not use their real names.

All primary and secondary works attributed to authors are listed under their authors' names. Questionable works, e.g., Piers Plowman, may be listed under the probable author and Anonymous Texts. For some authors, e.g., Shakespeare, subject sub-categories are used to further subdivide material about them because there is so much of it.

Writing in Theory and Practice

*Includes most anonymous works with the following exceptions: **Miracle and Morality Plays** and **Religious Literature** titles are listed under those categories; **Beowulf** and the **Bible** are listed separately and subcategorized.

**Includes only very general articles about theory. Articles on specific genres are listed under the genre in question.

***Includes general articles about literature in English from countries other than Britain and the U.S. but not limited to a specific genre. More specific articles are listed under the appropriate category, e.g., Fiction — Regional/Africa, Nigeria.

Sub-categories appear only in the annual index.

NOTES ON THE AUTOMATED INDEX

All material is in one monocase font; there are no typographical distinctions between titles, names or authors, and subjects.

Names exceeding 46 characters and spaces are abbreviated. Long titles of works are abbreviated when feasible or necessary.

In the subject index when just the first name of an author is used, it is printed in full; when two or more first names or initials are used, initials are printed. For Chaucer, Shakespeare, and certain very well-known foreign authors, only last names are printed.

Names with prefixes such as De, Mc, Mac, Van, or Von are printed as one unit and alphabetized accordingly. Alphabetization is strictly according to spelling. Because the computer does not pretend that there is an "a" in names beginning wih "Mc," these names are listed as they are spelled, i.e., they are not listed with names beginning with "Mac."

Titles—Lord, Baron, Earl, etc.—follow the full names, as do designations such as Saint, which is abbreviated. We do not use the title "Sir."
No apostrophes or periods are used. Commas are used in categories and subcategories to indicate inversions and to separate certain parts of sub-categories, e.g. Fiction — types/novel, science.

Authors of abstracted articles are listed in the annual index only, and their names are printed as they appear with the article. If you do not wish to have your name listed two or three different ways in the index, we suggest you sign your name in one standard form when you submit articles to journals.
